Final Draft Comments
Large Park Surface Soil Investigation

December 13, 2006

These are my comments

1. If this Plan was to focus on high -impact areas for children, Why is isn't the playground equipment area shown on every map of this report?
2. In looking at the maps where these playground equipment areas should be, there fails to be sampling done?
- 3
- 4 Also on page 5-1 concerning baseball or softball fields, it states that personnel will be instructed to collect additional five-aliquot surface soil samples at the baseball diamond in fields with exposed soil, playgrounds and other high child impact areas.
 - A) Does it not matter that small children may play on the ground as families watch baseball games near their bleachers?
 - B) Some fields only have one dot collected?
- 6 An Address should be given on each map, at least a Hundred Block, South or North.
 1. Adams Park Fig. 5-1
 - a) High impact is for children not tested around home plate.
 - b) Football practice has always been used on the land west of the basketball courts. No testing was done. East of the trees.
 - c) No testing East of Pond, there is a walking area all around this pond that families use.
 2. Brown Park Fig. 5-2
 - a) No sample around Pavilion and South of it. Children are known to play all around this Pavilion.
 - b) The South Tree Zone is a high impact area for children.
 3. Deer Park Fig. 5-3
 - a) The only Map in this Report to have a playground area in it.
 4. Fontenelle Park Fig 5-4
 - a) Why only 1 dot on this ball field?
 - b) Families are concerned that children play close to parents watching games.
 5. Hanscom Park Fig. 5-5
 - a) The Legend should be consistent with the compass. Since people turn maps according to their North.
 - b) No Pavilion shown.
 - c) Again no play equipment area

- d) Some roads are lacking on this map
- 6. Hitchcock Park
 - A) There should be three base ball fields shown in the box.
 - b) There is no playground shown.
- 7. Levi Carter Park
 - a) Hi impact area South of Cornish Blvd. only one sample taken there.
 - b) Also south of Cornish Blvd, there is a playground area
 - c) no baseball field, soccer field and structures are shown
- 8. Lynch Park
 - a) No Pavilion
 - b) No Playground equipment shown
- 9) Mandan Park
 - a) Map should be consistent with Legend and compass
 - b) Needs street names
 - c) Missing ball field
 - d) Missing structure
- 10 & 11) Miller Park
- 12) Mount Vernon Gardens
 - a) no street names on the north and south North Boundaries are -W st. -- South is Y street
- 13) Spring Lake Park
 - a) Missing Street names
 - b) Missing ball field
 - c) Missing play ground
 - d. no testing in fall field
 - e. no testing on sledding ground where over 100's of children roll and sled down the hill.
- 14) Upland Park
 - a) No water park shown
 - b) no soccer fields shown
